konvergent

Principal Data Architect

Reports To	**Director of Consulting**
Employment Type	**FTE**
Function	**Consulting**

AArchitecture is a critical strategic function, not an obscure technology discipline. But its practice is often viewed as complex and impenetrable.

By removing the noise, Konvergent reimagines Architecture consulting. Whatever the organisational challenge, we will help solve it – and then illuminate that solution with striking visuals that will make senior stakeholders sit up and take notice.

At Konvergent we focus on what's best for our clients. We are a team of helpful, empathetic people who offer high EQ as well as IQ. And our advice has the objectivity that comes from having no vendor partnerships (nor any other downstream agenda).

Over the last 5 years we have grown and evolved to become a highly resilient business and an emerging challenger to the established big 4 consultancies. For us, the next 5 years is about building a business that becomes the reference point for Architecture services in the UK and we invite you to join them in its pioneering journey and ambitions.

We are driven to realise the full potential of Architecture, are you?

Key Responsibilities

▶ Reporting into our fantastic Director of Consulting you will be responsible for acting as domain SME at a Principal Data Architect level, whilst also supporting the Consulting function in the successful execution of industry-leading client engagements.

▶ As Principal Data Architect you will provide in-depth domain knowledge and thought leadership; responsible for supporting Konvergent, clients and wider network with your expertise and experience.

▶ You will be expected to represent Konvergent at events and conferences, as well as producing case studies and papers for the business.

▶ Develop an understanding of Konvergent's consulting methodologies and deliverables, and how/where to modify and adapt these for new and existing client requirements.

▶ You will be confident working with a Konvergent project team (Architects, PM, Analysts & Design Team) to ensure projects are driven to successful conclusions, and on time.

▶ Work closely with Director of Consulting and Head of Talent to help grow and mature the practice through hiring, mentoring and learning & development.

konvergent

Skills & Experience

▶ A successful Principal Data Architect at Konvergent will have in-depth experience across at least one of the following domains: Data, Security, Integration or Cloud technologies.

▶ Experience with building capability planning, design thinking, strategy and Enterprise Architecture.

▶ Experience within a Tier 1 e.g., Big 4, or equivalent boutique consultancy.

▶ You will be confident working with ambiguity and complexity (either on your own or in a team), whilst still delivering positive and successful outcomes.

▶ You must demonstrate strong planning and organisational skills, including confidence and competence in your ability to prioritise certain tasks when under pressure.

▶ A successful Principal Data Architect at Konvergent will demonstrate superb interpersonal skills and will look to build and continually develop successful relationships with their teams and clients in line with our culture and core values.

How to apply:

We want to hear from you if you are the passionate and outcome-focused individual outlined above. Please send us your CV and cover letter to **careers@konvergent.co.uk**

Equal Opportunities

Konvergent is committed to encouraging diversity and inclusion as an employer and services provider. We aim to be truly representative of all sections of society and encourage an environment where everyone is respected and performing to the best of their ability. We do not and will not discriminate on the grounds of gender, marital status, race, ethnic origin, colour, nationality, national origin, disability, sexual orientation, religion or age.
